

BAC140

Airless Spray Pump by Asturo

For portability and ease of use the BAC140 Airless Diaphragm pump leads the field in value for money. Designed for use on small to medium size jobs the BAC140 is capable of spraying at up to an amazing 1.9 litres per minute. Many paint types may be used including interior emulsions; solvent-borne and water-borne primers, undercoats, gloss, eggshell, satin finish; stains, lacquers, varnishes and many more.

quality assurance

Asturo have designed and built spray equipment for 75 years for use in both the industrial and decorative markets. Manufacturing to ISO9001 standards the company is committed to building a reputation for tough, reliable and powerful machines. Based in Milan, Italy, Asturo distribute worldwide from their state of the art factory.

warranty and support

A one year back to base warranty on non-consumable parts comes as standard. Spraystore maintains a dedicated Spray Helpline to offer advice on day to day use or to arrange servicing and accessories

training

Courses are held periodically for groups of 10 to 15 people to be instructed in the use of airless and HVLP equipment. These days are extremely useful to new users as they can overcome the mystery that so often surrounds spray painting.
