

Nespri-TEC System

Unique mist free spray technology

Caparol The Nespri-TEC System:

Zero-overspray airless coating of interiors, building facades and concrete structures

The Nespri-TEC System is a totally new concept for spray coating of interiors, building facades, and concrete structures. Based on a unique, patented spray technology, the Nespri-TEC system has been specifically designed to allow Caparol Nespray formulation paints to be sprayed without overspray or "mist".

Available exclusively from Spraystore, Nespray offers unrivalled productivity, quality and efficiency. It is an essential investment for any contractor serious about reducing cost and increasing profits.

The benefits of mist free spraying

- Increase productivity by up to 80%
- Reduced labour costs
- Reduced health risks for the operative
- Costly temporary protection in the work space is no longer required
- High opacity, uniform finish
- Spray works can be conducted during regular opening hours in an active environment
- Minimal waste
- Fewer containers to dispose of
- Low emissions and environmentally friendly

The integrated operating hours counter gives a quick overview of the total machine operating time. This is important for calculating the cost of spraying the building.

| Technical data | |
|----------------|-------------|
| Hose length | 30 m |
| Motor power | 1.5 kW |
| Weight | 45 kg |
| Voltage | 230 V/50 Hz |

01. The tool box built into the trolley keeps the tools handy for use.
02. The Nespray unit is switched on with a flick of the wrist.
Step I: Material is drawn in.
Step II: The pressure builds up at the gun. (For additional safety, the two-stage switch prevents the unit being switched on or off under pressure.)
03. The separate high pressure filter is easily accessible and quickly cleaned. The additional filters protect against lime-consuming paint blockages, making the work easier. The filter insert with a mesh size of 100 is optimally matched to the Ampisilian / Muresko.
04. Self-cleaning in seven minutes due to the QuickClean system. Pull off the gun, lock it and the Nespray unit cleans itself automatically, while you carry on with more important tasks.
05. Airless double nozzle: Perfect spray pattern, high material throughput.
06. Fatigue-free working.
07. Heated high pressure hose: Ideal spraying temperature, consistently good spraying pattern.
08. The inlet valve trigger ensures a high level of operational safety. A press of the thumb and the valve is released.
09. The pneumatic tyres facilitate easy transport over steps, difficult building terrain or between floors.
10. Innovative diaphragm pump technology: More performance, uniform atomisation. Easy setting of the optimum spray pressure using the special Nespray pressure gauge.

Caparol Amphisilan:

Self-cleaning masonry paint

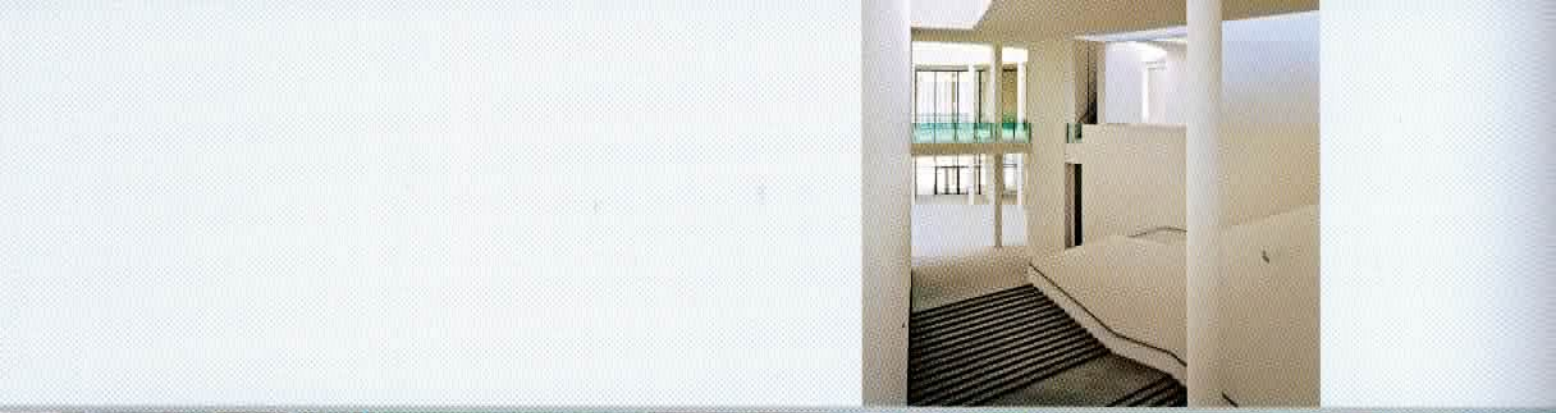

To fulfil the demands of any external environment, a modern masonry coating must be formulated to offer exceptional weather resistance, self-cleaning properties, excellent adhesion to a multitude of substrates and optimum durability.

Based upon Nano-Quartz technology, Amphisilan combines the incomparable properties of silicone paints with the universal application capabilities of dispersion paints. This means it can be installed on almost all exterior substrates, dries without blemishes and provides a self cleaning, water and dirt repellent finish that retains its "just applied" appearance for much longer in even the dirtiest, toughest large city and coastal environments.

Amphisilan – The benefits

- Self Cleaning – keeps "just applied" appearance for longer
- Weather resistant – highly durable surface does not chalk
- Scrub-Resistant – can be repeatedly cleaned without dulling or thinning the finished surface
- Highly water repellent
- Dirt and Carbon repellent – retains great appearance in highly trafficked city environments
- Can be applied without overspray by Nespray
- 2010 VOC compliant – satisfies the 2010 VOC legislation
- Emission minimised
- Solvent free
- Algae resistant
- Water thinnable – ensures excellent consistency and opacity with every coat even at ambient temperature extremes
- Frost Resistant
- UV stable
- Can be tinted by Caparol Colour Express

NespriFIXX and NespriSILAN – Contract Matt and Durable Matt

NespriFIXX provides all of the cost and performance benefits you would associate with a professional quality contract matt. NespriSILAN offers a durable, stain resistant finish that is up to 10 times more scrub resistant than some traditional vinyl matt coatings.

Both of these products are common, everyday, cost-effective solutions for most decoration needs. However when used in combination with the Nespray airless spray system they become completely unique throughout the entire industry.

NespriFIXX and NespriSILAN – The benefits

- Can be applied to interior wall and ceilings without overspray
- 2010 VOC compliant – satisfies the 2010 VOC legislation.
- Emission minimised
- Solvent free
- Water thinnable – ensures excellent consistency and opacity with every coat even at ambient temperatures extremes.
- Durable
- Highly scrub resistant (NespriSILAN)
- Washable (NespriSILAN)
- Available in a vast range of colours
- Can be tinted by Caparol Colour Express
